

XM Instant Traffic & Weather NAB's petition 04-160

I have been with XM radio for a number of years now. I consider 24 hour weather/traffic, "Progress in Technology." I believe we should continue with progress and not with greed.

Products should improve with age not regress. Many markets have a company that owns more than one station. Maybe one of those local stations need to convert 24 weather/traffic.

Even though I have XM radio, I still listen to local radio. I consider petition 04-160 abd the NAB anti-freedom of speech
